Instructor :

Rick Mayo, Taco’s Western Product & Application Instructor will conduct this class. Rick is an enthusiastic teacher with over 42 years in the hydronic industry. In his tenure Rick has taught for a major PEX manufacturer, was an Corp. Instructor for an industry leader in the condensing boiler arena, as well as had his own consulting and design business. He combines his practical experience and technical expertise to insure a productive, informative learning experience. Be assured you will receive a solid understanding of hydronic and plumbing applications along with how Taco products work within the plumbing and heating “System” !
